## EDUCATION

|                                        |                   |
|----------------------------------------|-------------------|
| <b>B.Tech in Computer Science</b>      | 2023 – Present    |
| Parul University, Vadodara             | CGPA: 7.34        |
| <b>Intermediate (11th – 12th CBSE)</b> | 2020 – 2022       |
| Bradford International School, Patna   | Percentage: 80.6% |

## SKILLS

|                              |                                                            |
|------------------------------|------------------------------------------------------------|
| <b>Programming Languages</b> | Java, JavaScript, C, Python (Basics)                       |
| <b>Frontend</b>              | HTML, CSS, Bootstrap, React.js, Next.js                    |
| <b>Backend</b>               | Node.js, Express.js                                        |
| <b>Database</b>              | MongoDB, MySQL                                             |
| <b>Tools</b>                 | Git, GitHub, VS Code, RESTful APIs                         |
| <b>Automation Tools</b>      | Claude, Cursor AI, Lovable, Black box                      |
| <b>Software Development</b>  | Data Structures & Algorithms, Authentication (JWT, Bcrypt) |

## INTERNSHIP EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                            |                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>Web Developer Intern, Code Technology (Remote)</b>                                                                                                                                                                                                                                                                                      | May 2025 – July 2025 |
| <ul style="list-style-type: none"><li>Developed and deployed a Finance Management Web Application for tracking income ,expenses and reports.</li><li>Used Git/GitHub for version control, collaboration, and deployment workflows.</li><li>Worked in an agile team environment with peer reviews and iterative feature delivery.</li></ul> |                      |
| <b>Web Developer Intern, Code Alpha(Remote)</b>                                                                                                                                                                                                                                                                                            | May 2025 – July 2025 |
| <ul style="list-style-type: none"><li>Designed and developed a Business website.</li><li>Enhance responsiveness for mobile and tablet devices.</li><li>Fixed UI bugs and improved user experience and implemented modern UI design.</li></ul>                                                                                              |                      |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>ML Model Comparison Dashboard</b>   <i>Streamlit, Scikit-learn ,Pandas</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <a href="#">Deployed Link</a> |
| <ul style="list-style-type: none"><li>Built an end-to-end ML web application for data upload, preprocessing, model training, and evaluation.</li><li>Implemented multiple classification &amp; regression models with automated comparison and cross-validation.</li><li>Developed interactive data visualization and preprocessing pipelines (encoding, scaling, missing value handling).</li><li>Integrated clustering algorithms and real-time prediction interface with downloadable model and results.</li></ul>               |                               |
| <b>College Canteen Hub</b>   <i>HTML, CSS, JavaScript (localStorage)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <a href="#">Deployed Link</a> |
| <ul style="list-style-type: none"><li>Developed a multi-role web platform (Customer, Shopkeeper, Admin) for managing and browsing 56+ campus canteens.</li><li>Built a real-time menu management system enabling shopkeepers to add/update items with instant visibility to customers.</li><li>Implemented dynamic cart and ordering interface with search, filtering, and seamless user experience.</li><li>Designed an admin dashboard to monitor menus, track shop activity, and generate reports across all canteens.</li></ul> |                               |

## ACHIEVEMENTS

- Selected for startup incubation program at Vadodara Startup Fest, receiving mentorship and guidance to develop a scalable product.
